OBJECTIVE

To work in Back-end Development, Databases, and Digital Security, combining an interest in Blue Team and Digital Forensics with solid knowledge of Relational Databases (MySQL), Java, and Software Engineering.

PROFESSIONAL PROFILE

6th-semester Computer Science student at Universidade Franciscana (UFN), with a solid track record in research, specialized technical support, and technology development. I am currently transitioning my career toward opportunities focused on Back-end Development, Databases, or Digital Security.

My professional experience includes working as an Apple Technical Assistant at iHelpU, where I developed critical skills in technical support, hardware and software troubleshooting, and customer service excellence. Within the academic and innovation ecosystem, I worked as an Undergraduate Research Fellow at ITEC Park (UFN Technology Park) and as a member of the UFNBotz robotics team, leading and contributing to applied technology projects involving 3D modeling and printing, laser cutting, Arduino, and robotics.

I am driven by the challenge of building robust, secure, and efficient solutions, combining my background in prototyping and programming logic with software engineering best practices.

CORE SKILLS

- **Development:** Java, C, C++, C#, JavaScript.
- **Databases:** MySQL, SQL Server, Relational Databases.
- **Digital Security:** Blue Team and Digital Forensics (areas of interest).
- **Software Engineering:** Software structure and architecture.
- **Support & Infrastructure:** Technical Support, Apple Technical Assistance, Customer Service.
- **Innovation & Prototyping:** Electronics, Robotics, Arduino, 3D Modeling (Fusion/AutoCAD), 3D Printing, Laser Cutting.

LANGUAGES

- Advanced English
- Native Portuguese
- Spanish

PROFESSIONAL EXPERIENCE

- **Apple Technical Assistant** — iHelpU Santa Maria (2026)

Main activities: Apple technical support, hardware and software troubleshooting, and customer service.

- **Scientific Initiation Scholarship** — ITEC Park, UFN Technology Park (2025–2026)

Main activities: applied research and development of technological prototypes, using 3D modeling and printing, laser cutting and Arduino.

- **Probit Scholarship** — FAPERGS - Research Support Foundation of the State of Rio Grande do Sul (2024–2025)

Main activities: Research and development of biomaterials for health, with experience in electrospinning and optimization of production variables to create innovative solutions. Focus on sustainability, innovation and application of advanced technologies.

- **Administrative Intern** — São Sepé Municipal City Council, CMVSÃOSEPÉ (2022)

Main activities: document organization, administrative support, and public assistance.

EDUCATION

- **B.Sc. in Computer Science (in progress)** — Universidade Franciscana (UFN), 6th semester

- **High School Diploma** — Colégio Estadual São Sepé (CESS), completed in 2022

ADDITIONAL TRAINING

- **Cybersecurity (2025)** — 50h — Faculdade Bookplay
- **Foundations of Python Pandas for Data Analysis and Manipulation (2024)** — 4h — Universidade Franciscana (UFN)
- **Robotics with Arduino (2024)** — 25h — Universidade Franciscana (UFN)
- **3D Bioprinting (2024)** — 4h — Brazilian Society of Biomedical Engineering (SBEB)
- **Basic and Intermediate English (2022–2023)** — 50h — Centro Profissional de Educação a Distância (CEPED)
- **Computational Thinking (2022)** — 2h — Academia PME (APME)
- **Introduction to Software Quality (2022)** — 2h — Academia PME (APME)
- **Girls-Only Programming Workshop (2020)** — 20h — Federal University of Santa Maria (UFSM)

DEVELOPMENT PROJECTS

- **Spend Control API (2026)**
Residential expense control system developed as a technical challenge, with back-end in ASP.NET Core (C#) and front-end in React + TypeScript.
- **Dubbio (2026)**
Website for organization and decision for movies and series.
- **Collection Management System — Museu Treze de Maio (2026)**
System developed for cataloguing and managing the museum's historical and bibliographic collection.

EVENT PRESENTATIONS

- **Brazilian Congress of Biomedical Engineering (2024)** — Presentation of a theoretical-practical study on EMG signal processing using Machine Learning.
- **10th Technology Showcase (2024)** — Presentation of the project “Development of Smart Wound Dressings with Biodegradable Components for Animals.”
